

AI ASS 14.1

Name: B.Sanjana

H.T.N0:2303A52306

Batch:43

Task1:portfolio website

Prompt:

Create a modern personal portfolio website using HTML, CSS, and JavaScript.

Include sections for About Me, Projects, and Contact.

Use a clean color palette and suggest suitable typography.

Make the layout responsive using Flexbox and Grid.

Add smooth scrolling navigation for better user experience.

```
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">

161   background-color: var(--dark-secondary);
162   color: #fff;
```

PS C:\Users\Sanja\Downloads\My-portfolio-main>

```
1 document.addEventListener("click", function (event) {
2   if (event.target.hasAttribute("data-theme")) {
3     const themeFile = event.target.getAttribute("data-theme");
4     const themeButtons = document.querySelectorAll("[data-theme]");
5     themeButtons.forEach(btn => btn.classList.remove("active-theme"));
6     event.target.classList.add("active-theme");
7     document.getElementById("themeStylesheet").setAttribute("href", themeFile);
8   }
9 });
10
```

PS C:\Users\Sanja\Downloads\My-portfolio-main>

Output:

Observation:

The portfolio website was developed using HTML, CSS, and JavaScript with a clean and well-organized structure.

It includes clear sections for About Me, Projects, and Contact to improve navigation.

CSS was used to create a consistent color palette, typography, and responsive layout using Flexbox/Grid.

JavaScript was implemented to enable smooth scrolling navigation for a better user experience.

Overall, the website is simple, responsive, and effectively showcases my work.

Task2: Online Store Product Page

Prompt

Design a responsive product page using HTML, CSS, and JavaScript displaying image, title, price, and an “Add to Cart” button.

Use BEM methodology for structured and reusable CSS styling with hover effects.

Add JavaScript functionality to show an alert when the “Add to Cart” button is clicked.

The screenshot shows the VS Code editor with a file named `index.html` open. The editor displays CSS code for styling a product card. The code includes a `<style>` block with the following rules:

```
.product_title {
  font-size: 20px;
  margin: 10px 0;
}

.product_price {
  color: green;
  font-size: 18px;
  margin-bottom: 10px;
}

.product_button {
  padding: 10px 15px;
  border: none;
  background-color: #007bff;
  color: white;
  cursor: pointer;
  border-radius: 5px;
  transition: background 0.3s;
}

.product_button:hover {
  background-color: #0056b3;
}
```

The screenshot shows the VS Code editor with a file named `index.html` open. The editor displays HTML code for a product card. The code includes a `<head>` section with a `<style>` block, a `<body>` section with a `<div class="product">` block, and a `<script>` block. The `<div class="product">` block contains an `<img>` tag, an `<h2 class="product_title">` tag, a `<p class="product_price">` tag, and a `<button class="product_button" onclick="addToCart()">` tag. The `<script>` block contains a `function addToCart() {` function that alerts "Product added to cart!".

Output:

Observation:

The product page is designed using HTML, CSS, and JavaScript with a clean and structured layout.

BEM methodology ensures organized and reusable class naming, and the layout is responsive across devices.

Hover effects and the “Add to Cart” alert improve user interaction, making the page simple and user-friendly.

Task3: Event Registration Form

Prompt:

Create an event registration form using HTML, CSS, and JavaScript with fields for name, email, phone, and session selection.

Add JavaScript validation to ensure all inputs are correctly filled before submission.

Style the form professionally and include proper labels and ARIA attributes for accessibility.

The image shows a screenshot of the Visual Studio Code (VS Code) editor interface. The top menu bar includes File, Edit, Selection, View, Go, Run, Terminal, and Help. The Explorer sidebar on the left shows a project structure with 'index.html' selected. The main editor area displays the content of 'index.html', which is an HTML document with a JavaScript script for an event registration form. The script includes a submit event listener that validates the form fields (name, email, phone, session) and sets error messages for the 'name' and 'email' fields. The bottom status bar shows 'PROBLEMS', 'OUTPUT', 'DEBUG CONSOLE', 'TERMINAL', and 'PORTS'.

```
129 <html lang="en">
130 <body>
131
132 <script>
133     document.getElementById("registrationForm").addEventListener("submit", function(e) {
134         e.preventDefault();
135
136         let valid = true;
137
138         let name = document.getElementById("name").value.trim();
139         let email = document.getElementById("email").value.trim();
140         let phone = document.getElementById("phone").value.trim();
141         let session = document.getElementById("session").value;
142
143         document.querySelectorAll(".error").forEach(el => el.textContent = "");
144
145         if (name === "") {
146             document.getElementById("nameError").textContent = "Name is required";
147             valid = false;
148         }
149
150         if (!email.includes("@")) {
151             document.getElementById("emailError").textContent = "Enter valid email";
152             valid = false;
153         }
154     });
155 </script>
156 </body>
157 </html>
```

Output:

The image displays two screenshots of a web browser showing an "Event Registration" form. The browser's address bar indicates the file path: `C:/Users/Sanja/OneDrive/Desktop/AI%20ass%2014.1/Event%20registration%20form/index.html`.

Top Screenshot (Empty Form):

- Title:** Event Registration
- Name:**
- Email:**
- Phone:**
- Session:**
- Submit:**

Bottom Screenshot (Filled Form):

- Title:** Event Registration
- Name:**
- Email:**
- Phone:**
- Session:**
- Submit:**

Observation:

The event registration form is built using HTML, CSS, and JavaScript with a clean and professional design.

Form validation ensures correct input, while labels and ARIA attributes improve accessibility.

The layout is user-friendly, responsive, and provides a smooth registration experience.

Task4: Resume Website

Prompt:

Create a one-page resume website using HTML, CSS, and JavaScript with sections for Profile, Skills, Education, and Experience. Use CSS Grid for layout, professional typography, and smooth scrolling navigation.

The screenshot shows the VS Code editor with a file named 'index.html'. The code is as follows:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>My Resume</title>
7
8   <style>
9     body {
10       margin: 0;
11       font-family: 'Poppins', sans-serif;
12       display: grid;
13       grid-template-columns: 250px 1fr;
14       min-height: 100vh;
15     }
16
17     /* Sidebar */
18     .sidebar {
19       background: linear-gradient(180deg, #2c3e50, #4ca1af);
20       color: white;
21       padding: 20px;
22     }
23
24     .sidebar h2 {
25       text-align: center;
26       margin-bottom: 30px;
```

The screenshot shows the continuation of the CSS code in the VS Code editor:

```
39   .sidebar a:hover {
40     background: rgba(255,255,255,0.2);
41   }
42
43   /* Main Content */
44   .main {
45     background: #f4f7fb;
46     padding: 30px;
47   }
48
49   .section {
50     margin-bottom: 30px;
51   }
52
53   .card {
54     background: #fff;
55     padding: 20px;
56     border-radius: 12px;
57     box-shadow: 0 4px 12px rgba(0,0,0,0.1);
58   }
59
60   h1 {
```

```
109 <body>
110
111 <div class="main">
112
113 <section id="skills" class="section">
114 <div class="card">
115 <div class="skill">CSS</div>
116 <div class="skill">JavaScript</div>
117 <div class="skill">Python</div>
118 <div class="skill">SQL</div>
119 </div>
120 </section>
121
122 <section id="education" class="section">
123 <div class="card">
124 <h3>Education</h3>
125 <p><strong>B.Tech in Computer Science</strong></p>
126 <p>SR University, 2023 – 2027</p>
127 </div>
128 </section>
129
130 <section id="experience" class="section">
131 <div class="card">
132 <h3>Experience</h3>
133 <p><strong>Intern - Web Development</strong></p>
134 <p>Worked on building responsive web applications using HTML, CSS, and JavaScript.</p>
135 </div>
136 </section>
137 </div>
138 </body>
139 </html>
```

Output:

Observation:

The resume website uses a clean one-page layout with well-structured sections and professional typography. CSS Grid and smooth scrolling enhance responsiveness, alignment, and overall user experience.

Task5: Restaurant Menu Page

Prompt:

Design a restaurant menu page using HTML and CSS displaying food name, description, and price in card layout.

Use a warm food-friendly color palette, responsive design, and add hover effects on menu items.

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Restaurant Menu</title>
7
8 <style>
9   body {
10     margin: 0;
11     font-family: 'Segoe UI', sans-serif;
12     background-color: #f0f0f0;
13   }
14
15   h1 {
16     text-align: center;
17     padding: 20px;
18     color: #d35400;
19   }
20
21   /* Search */
22   .search {
23     text-align: center;
24     margin-bottom: 20px;
25   }
```

```
41 .categories button {
42   border: 1px solid #d35400;
43   border-radius: 20px;
44   cursor: pointer;
45   transition: 0.3s;
46 }
47
48 .categories button:hover {
49   background-color: #d35400;
50 }
51
52 /* Menu Grid */
53 .menu {
54   display: grid;
55   grid-template-columns: repeat(auto-fit, minmax(250px, 1fr));
56   gap: 20px;
57   padding: 20px;
58 }
59
60 /* Card */
61 .card {
62   background-color: #fff;
63   border-radius: 12px;
64   padding: 10px;
65 }
```

```
126 <body>
127   <div class="menu">
128     <div class="card-content">
129       <h3>burger</h3>
130       <p>juicy grilled patty with sauces.</p>
131       <div class="price">$7</div>
132       <button class="btn" onclick="addCart()">Add to Cart</button>
133     </div>
134
135     <div class="card">
136       
137       <h3>Ice Cream</h3>
138       <p>sweet and refreshing dessert.</p>
139       <div class="price">$4</div>
140       <button class="btn" onclick="addCart()">Add to Cart</button>
141     </div>
142   </div>
143
144   <script>
145     function addCart() {
146       alert("Item added to cart!");
147     }
148   </script>
149 </body>
```

Output:

Observation:

The menu page uses a clean card-based layout with warm colors that enhance food appeal.

Responsive design and hover effects improve user interaction and browsing experience.
